Education

RGPV University (Lakshmi Narain College Of Technology, Bhopal) *May 2025*
Bachelor of Engineering in Information Technology *CGPA: 7.67/10*

Central Academy School | Gwalior, Madhya Pradesh *May 2021*
CBSE Class 12th *Percentage: 81.8*

Army Public School | Gwalior, Madhya Pradesh *May 2019*
CBSE Class 10th *Percentage: 78.2*

Experience

Learning-based internship
IBM *Jul 2023 - Aug 2023*

- Learning-based internship on Artificial Intelligence, working on the 'Mental Fitness Tracker' project.
- Acquired skills in importing and organizing datasets, a fundamental step in AI and data analysis.
- Learned basic data examination techniques to uncover patterns and insights within datasets.
- Gained expertise in selecting relevant features from datasets, enhancing AI model accuracy.

Cybersecurity and Networking Intern
CISCO *Sep 2023 - Oct2023*

- Explored fundamental principles of cybersecurity, gaining a solid foundation in identifying and addressing modern cyber threats effectively.
- Acquired in-depth knowledge of networking essentials, focusing on the core concepts and techniques of computer networking systems.
- Gained hands-on experience with Cisco Packet Tracer, using it to create, visualize, and troubleshoot complex network scenarios virtually.

Skills

- **Programming:** C, C++, Python, DSA, HTML, CSS, OOPs Concepts
- **Libraries/Frameworks:** Pandas, SQL, Numpy, FastAPI, PYgame
- **Tools/Platforms:** Jupyter, Packet Tracer

Projects

Medical Data Extraction |

- Spearheaded the development of a healthcare document data extraction system, automating data retrieval from scanned records and prescriptions for streamlined insurance claims.
- Employed Pytesseract in combination with image processing techniques, and custom regex matching to ensure precise and accurate data extraction, even from documents of varying quality.
- Created a user-friendly FASTAPI-based frontend for hospitals and insurance companies to interact with and verify extracted data, improving document management and claims processing efficiency.

Grocery store management |

- Developed a user-centric website for streamlined grocery management, targeting individual and business needs. Employed HTML, CSS, JavaScript, and Bootstrap for crafting an intuitive and easily navigable interface, enhancing user experience and interaction.
- Engineered a robust backend system using Python and Flask, ensuring efficient and reliable data processing. This development significantly contributed to the website's performance and user satisfaction.
- Architected and implemented a 3-tier system architecture, integrating MySQL for secure data storage. This design facilitated efficient management of grocery items and customer orders, while ensuring smooth interoperability between frontend, backend, and database layers.

Hospitality Domain Data Analysis |

- Analyzed hospitality market data using Python and Pandas to identify causes of market share loss.
- Improved skills in data cleaning and transformation, ensuring accurate and reliable analysis.
- Enhanced understanding of data's business impact, leading to actionable insights for market strategy.

Voice Assistance | *Dec 2022*

- Developed "Jarvis," a Python-based intelligent voice assistant, with interactive and responsive command-driven actions, including accurate speech-to-text conversion for effective command interpretation.
- Enhanced Jarvis's user experience with pyttsx3 for natural voice responses and added web browsing functionality for seamless online task execution.
- Integrated advanced features in Jarvis, such as joke-telling using pyjokes and Efficient file & directory management using Python's OS module.
